A GUIDE FOR YOUR MADE-TO-ORDER PIECE

Measuring for Delivery

Thoughtfully designed for your space.

Every Bloom Home piece is made to order, in the size, fabric and finish you choose. Because it is made just for you, a few minutes with a tape measure now makes sure it fits beautifully in your room and arrives through the door without a hitch. Measure three things:

1. Your space

Where the piece will live, and the room around it.

2. Your piece

How its width, depth and height are measured.

3. The way in

Every door, hallway, stair and elevator on the route.

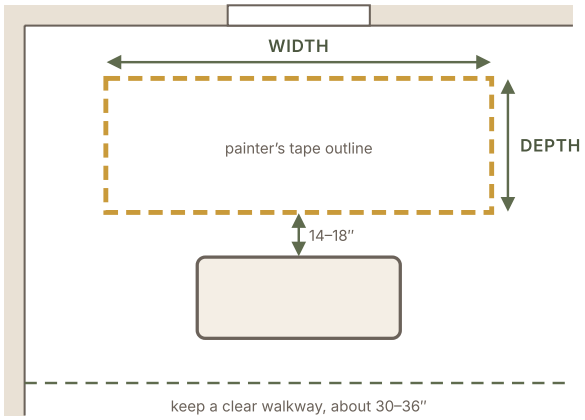

You will need

- A metal tape measure
- Painter's tape
- A helper
- This guide and a pencil

Measure in inches, at the narrowest point of every opening. When in doubt, measure twice and send us your numbers: we are happy to check them for you.

1 Measure your space

Start with the spot where the piece will sit, then look at the room around it.

Tape the piece's outline on the floor at the size you are considering, and live with it for a day or two. It is the easiest way to feel the size before it is made.

What to measure

- ✓ **Width** of the wall or area, side to side.
- ✓ **Depth** you can give the piece, from the wall forward.
- ✓ **Height** under any window sill, shelf or artwork it will sit beneath.
- ✓ Where **outlets, vents, radiators and switches** sit, so nothing is blocked.
- ✓ Which way **doors swing** into the room.

A good fit, as a guide: leave about 30–36″ for walkways, 14–18″ between the sofa and a coffee table, and a few inches between the back and a window or wall so curtains hang freely.

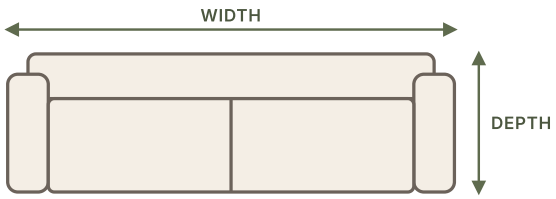

Your space

MEASUREMENT	INCHES	NOTES
Wall or area width	_____ in	
Depth available from the wall	_____ in	
Window sill or shelf height	_____ in	
Outlets, vents or radiators		

2 Know your piece

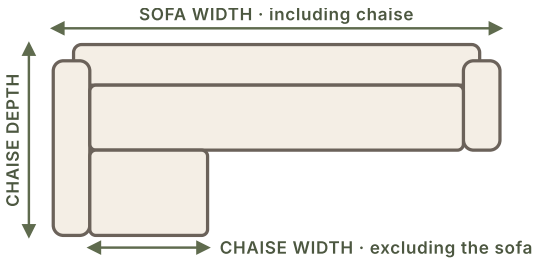

These are the same measurements you enter in our sofa and ottoman builders. Pieces are measured at their widest, deepest and tallest points, including arms, legs and cushions.

Sofa

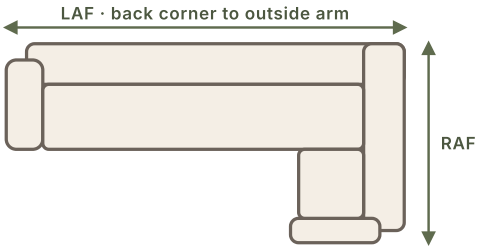

Width is arm to arm, side to side. **Depth** is from the back to the front of the arm or seat. **Height** is from the floor to the top of the back.

Sofa with chaise

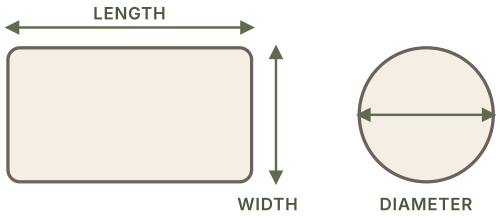

Sofa width runs the full length, including the chaise. **Chaise depth** is back to front. **Chaise width** is the chaise seat alone.

Sectional

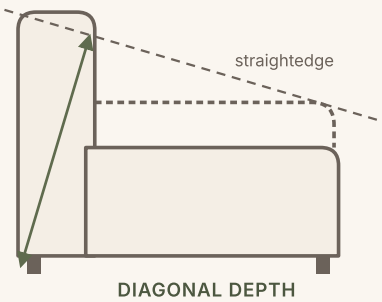

Each side is measured **from the back corner to the outside of the arm**. LAF is the left side and RAF the right side, as you face the sectional.

Ottoman

Rectangles are **length × width**, squares one size each side, and rounds are measured **straight across**. Height is floor to top.

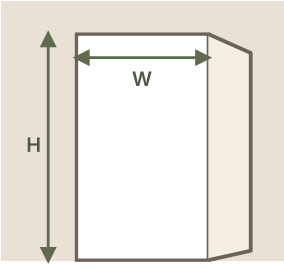

Diagonal depth

The smallest opening a sofa can pass through when it is tilted onto its back. Lay a straightedge from the top of the back to the front of the arm, then measure from the bottom back corner straight up to it.

Not sure? Ask us for the diagonal depth of your style at the size you are ordering.

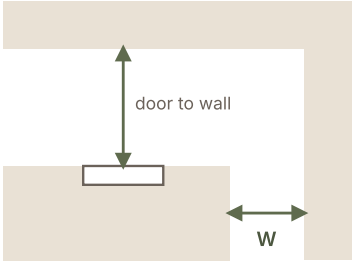

3 Measure the way in

Walk the route from the street to the room and measure every opening at its narrowest point: trim, handrails, light fixtures and door hardware all count.

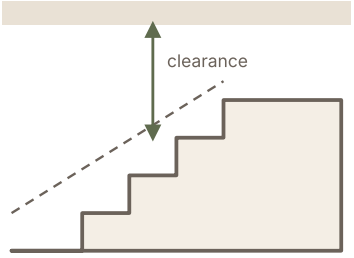

Doorways

Width with the door fully open, from the door face to the opposite frame, and the height. Removing a door can gain an inch or two.

Hallways & corners

Hallway width, ceiling height, and the distance from each doorway to the wall opposite: that is the room you have to turn.

Stairs

Width between handrails, the lowest ceiling over the stairs, and the landing size where the stairs turn.

Elevators

Door opening width and height, and the inside width, depth and height. Measure the inside diagonal too, from a bottom front corner to the opposite top back corner, and ask the building about a service elevator or padding.

A simple rule

If an opening is wider than the piece's **depth**, it can usually pass on its side. If not, compare the opening with the **diagonal depth**. Tight on both? Send us your numbers before you order and we will check them with you.

THE WAY IN	WIDTH	HEIGHT
Front or entry door	_____ in	_____ in
Door to opposite wall	_____ in	
Hallway	_____ in	_____ in
Stairs and landing	_____ in	_____ in
Elevator door	_____ in	_____ in
Elevator inside	_____ in	_____ in
Room doorway	_____ in	_____ in

4 Before delivery day

When we schedule white glove

Tell us about anything that affects the delivery: stairs and how many flights, a gated or hard-to-reach entry, limited parking, or an elevator that needs booking.

Please note: our standard delivery is a drop-off service only and does not include inside delivery or unboxing.

On the day

- ✓ Clear the route and the spot where the piece will go.
- ✓ Take down low light fixtures or artwork along the way.
- ✓ Put your rug in place first.
- ✓ Keep pets in another room.
- ✓ Check your piece before the team leaves.

Made to order, made to fit

Because every bespoke piece is made in the size and fabric you choose, it is yours alone. Please check that it fits your space and the way in before you confirm your order.

Custom made and sale items are considered final sale and cannot be returned.
